

THIS PATIENT HAS KIDNEY DISEASE AND IS RECEIVING HEMODIALYSIS

- No blood pressure in the arm with the dialysis vascular access.
- No needle punctures in same arm as dialysis access.
- Use hand veins if possible, if not ask MD.
- In case of possible fluid restriction, please check with MD before administering fluids.
- Do not use an IV or PICC line in arm with dialysis access, and if there is no access, use dominant arm.
- Do not administer tests with dyes without consulting Nephrologist.
